1) Can I add this control in the ArrayCtrl??

You can add any control including DateTimeCtrl

Quote:

2) Typing some caratcter, like: -, +, etc in this control crash the application. The default language is IT-IT.

I have to check that.

Quote:

3) After chosing the date, the control allow the keybord to type a long serie of space, or other chars, displayed as: 04/04/2007////////////////////////.... in the control.

DateTimeCtrl is using EditDate control, so this one goes to Mirek
