2) Typing some caratcter, like: -, +, etc in this control crash the application. The default language is IT-IT.

This is a serious bug in EditField class, I think.

Fix:

CtrlLib/EditField.cpp, int EditField::Insert(int pos, const WString& itext)

Change line

if(chr && charset == CHARSET_UNICODE || FromUnicode(chr, charset, 0))

to

if(chr && (charset == CHARSET_UNICODE || FromUnicode(chr, charset, 0)))
