Look at the beginning of SqlCommander.cpp

```
#if defined(PLATFORM_WIN32) && defined(COMPILER_MSC)
#define HAVE_OLEDB
#endif
```

This means that OLEDB connections are disabled for migw, that is why it works...

You cannot compile it most likely because you have not installed part of SDK that provides OLEDB.

I suppose you are not very interested in OLEDB, therefore a simple way how to get around the problem is to disable for MSC too:

```
#if defined(PLATFORM_WIN32) && defined(COMPILER_MSC)
// #define HAVE_OLEDB
#endif
```
