mrmodolo wrote on Fri, 20 April 2007 11:21Hi,
I am using UPP in windows a long time (I have a Oracle database and connect to It by UPP...).
Now in my work some machines are migrating to Linux, I try the SQL_Oraclein my KUBUNTU
6.10 but did no compile. The other examples work very well (now OpenGL work too). I have the
client .so librarys and sdk oracle oci but did not work.

What I am doing wrong?

thanks a lot,

Frankly, I do not know You are the first one trying this...

What are errors?

Mirek
