Hi,

Quote:

A bug in DbfStream related to encoding - unable to cope with UTF8.

Non-perfect quick fix (line 228):

```
void DbfStream::SetCharset(byte cs)
{
    charset = cs;
    byte dest = GetDefaultCharset();
    if(dest == CHARSET_UTF8)
        dest = CHARSET_WIN1252;
    codepage_cv = false;
    for(int i = 0; i < 256; i++) {
        codepage_uni[i] = ToUnicode(i, charset);
        codepage_map[i] = FromUnicode(codepage_uni[i], dest);
        codepage_rev[i] = FromUnicode(ToUnicode(i, dest), charset);
        if(codepage_map[i] != i)
            codepage_cv = true;
    }
}
```

Mirek

How could I use this advice, to check if I'm having the same problem ?

Sven
