See Core/TimeDate.cpp. It looks like these should change the format for every date/string conversion:

```
void SetDateFormat(const char *fmt);
```

Sets the format for date to string conversions (default: "%2:02d/%3:02d/%1:4d") and

```
void SetDateScan(const char *scan);
```

Sets the format expected when doing string-date conversions (default: "mdy").

James
