Subject: howto clean up generated test data? Posted by ebojd on Sat, 28 Apr 2007 15:12:06 GMT View Forum Message <> Reply to Message

I have a couple of integrated test suites that I have cobbled together with U++...

These test suites often generate temporary files/data that have to be visually inspected. Once verified, is there a way to add them to a list of files to "clean" or be removed? I've poked around the docs a little and do not see anything obvious...

Thanks and best regards,

EBo --
