
Subject: How to promote U++ ?

I see to promote U++ is to encourage those writing mfc and jdk be converted to u++. To this end, we need a demo. A good demonstration to prove that it is not very difficult to convert mfc or jdk to u++. But, there are two questions needed to be answered:

- 1) is it really not difficult to convert mfc or jdk to u++?
- 2) is it a compiled u++ application running better than those coded in mfc and jdk?

Below is the top ten most downloaded projects in sf.net . I am wondering whether it is feasible to put U++ to a real test by selecting one project below and translate it to U++.

(<http://sourceforge.net/top/topalltime.php?type=downloads>)

Rank	Project	Downloads
------	---------	-----------

1	eMule	306,676,685
---	-------	-------------

2	Azureus	142,672,486
---	---------	-------------

3	Ares Galaxy	98,401,852
---	-------------	------------

4	BitTorrent	51,850,559
---	------------	------------

5	DC++	44,984,511
---	------	------------

6	Shareaza	37,593,642
---	----------	------------

7	VirtualDub	32,250,011
---	------------	------------

8	CDex	31,847,885
---	------	------------

9	GTK+ and The GIMP installers for Windows	26,724,204
---	--	------------

10	7-Zip	
----	-------	--
