```
sprintf (fname, "%s%02d.dat", "./gauss_test", i%32);
```

```
String fname = Format("%s%02d.dat", "./gauss_test", i%32);
```

(Could not resist).

As for updates: Yes, to get window repainted, it needs to receive events. Call `ProcessEvents()` is exactly what you need here.... (no need to supply quit IMO).
