Hi James,

when i use this

```
editor.SetFont(Font::ARIAL, 16);
```

i get these error:

```
G:\Entwicklung\UPP\prohibisZA\main.cpp: In constructor `prohibisZA::prohibisZA()':  
G:\Entwicklung\UPP\prohibisZA\main.cpp:29: error: no matching function for call to  
'Upp::LineEdit::SetFont(Upp::Font::<anonymous enum>, in  
t)'  
C:/Programme/UltimatePP/uppsrc/CtrlLib/TextEdit.h:311: note: candidates are: Upp::LineEdit&  
Upp::LineEdit::SetFont(Upp::Font)  
G:\Entwicklung\UPP\prohibisZA\main.cpp:30: error: stray '\184' in program  
G:\Entwicklung\UPP\prohibisZA\main.cpp:30: error: `INK_NORMAL' undeclared (first use this  
function)  
G:\Entwicklung\UPP\prohibisZA\main.cpp:30: error: (Each undeclared identifier is reported only  
once for each function it appears in.)  
prohibisZA: 1 file(s) built in (0:02.34), 2344 msec / file, duration = 2375 msec, parallelization 0%
```

Do i have to include somethings special to use font or color?

Michael
