Subject: Re: Set color in lineedit widget Posted by michael on Tue, 08 May 2007 14:44:47 GMT View Forum Message <> Reply to Message

Great, that works. But which values can be set as color? Blue(), Black() etc. Where is this defnied?

And besides this problem... It couldn't be that hard to add some simple String to this LineEdit Control. Yes, i can type some text into this control but i would like to add some string like this:

editor.Insert("A\_Test");

What's the right method to insert a string into a LineEdit Control?

Michael
