Subject: Re: UPP2007.1 - RichEdit, Link Errors
Posted by kcabobert on Mon, 14 May 2007 16:29:14 GMT

When I tried to compile the exact same app on a different Mac I get the previous error. I am very confused, I tried to adjust the package order in the same way as before (it matches the other machine exactly) to no avail.

If anyone has thoughts on this I would appreciate it very much.

Robert
