Zardos wrote on Tue, 15 May 2007 19:28Hello!

I have discovered Ultimate++ some weeks ago. And I LOVE IT!!!

We love it too

Quote:

As an exercise to get used to Ultimate++ I made a small patch which adds the functionality to:

Highlight all errors in the editor(s) after an "compile", "build" and "rebuild".

That's great! Mirek, I can check and apply this patch if you don't mind.

Yesterday I also extended highlighting capabilities. I added highlighting of text in UPPER, sql functions, sql boolean expressions and ultimate macros. So now expressions like SQL * Select(NAME, AGE).From(PEOPLE).Where(ID=1) looks much better IMO.

(Unfortunately i have not found the place in the source where the default colors are defined, ... and the default color is now "transparent")

I'm searching this one too...
