Ok here comes the patch.

There was probably a merge error.

I fixed another bug: With new files no markers appeared until switching to another tab.

While doing the merge I recognized the space between if / for and ( were removed. if () -> if()... I will try to adapt to the upp-style. But old habbits are hard to fight

BTW: The new Tabs are nice!!!

Middle Click does not remove the tab, yet. But I guess you already now, this.
