Ok here comes the patch.

There was probably a merge error.

I fixed another bug: With new files no markers appeared until switching to another tab.

While doing the merge I recognized the space between if / for and (were removed. if () -> if()...

I will try to adapt to the upp-style. But old habits are hard to fight

BTW: The new Tabs are nice!!!

Middle Click does not remove the tab, yet. But I guess you already know, this.
