unodgs wrote on Thu, 24 May 2007 22:45: Is this all included in MarkErrorsAndEdits_4.patch (which is now merged)?

No. I uploaded a new patch, but as usual found some more errors -> and deleted it from the message board.

Sorry!!

Just prepare the next version if you want, even without the new patch. I will do more testing this time and upload a new patch if I consider it, ready. If in the meanwhile svn is updated, that's no problem. I will do the merge here and supply a patch on the latest svn.

Sorry, again for so much trouble about such a small thing...
