
Subject: can't use SetLabel and Tip for Option (only one or the other)

Posted by [objohn](#) on Fri, 25 May 2007 18:48:47 GMT

[View Forum Message](#) <> [Reply to Message](#)

If a Tip is set in the Layout Designer for an Option control, and a label is set also in the designer (in the SetLabel section), there is a compile error generated:

C:/MyApps/test.lay:2: error: 'class Upp::Ctrl' has no member named 'SetLabel'

Removing either the tip or label from the designer (and manually setting it in code) fixes the compile issue.

I've attached a simple test case.
