waxblood wrote on Sat, 26 May 2007 17:16I didn't understand one thing: the upp source in the windows installation should compile on Linux too, or I have to wait a proper Linux release?

I've tried to compile the 705-dev3 under Xubuntu-Feisty but I've got this error:

Sorry, we are still lagging with X11 D&D. But things seems to progress, I can already drop into U++ apps from other X11 apps, now just have to fix remaining issues in that "drag" part.
