```
lang = LNGFromText(s);  
if(!lang)
```

I got app crashed becouse of attempt to read beoyound the string in
LNGFromText(s);

i have s.GetCount() == 0;

```
so  
int LNGFromText(const char *s)  
{  
    int l = 0;  
    if(IsAlpha(*s)) {
```

s == NULL , and will fail , Am i right ?
