I have nothing makeing this default (if the license is OK - it most likely is).

Anyway, default for TheIDE. I would rather keep CtrlLib.iml as it is and override CtrlLib icons just for TheIDE.

(One reason is that I think CtrlLib.iml icons are much simpler and therefore pack to smaller size, which makes better default for small apps IMO).

OTOH, nothing against doing this as package that alters the CtrlLib appearance. Hmm, idea, just like we have "plugin/", what about to start another group "look/"?
