ebojd wrote on Thu, 31 May 2007 09:21I would love to see better and/or more thorough adaptation of Boost projects into Upp.

EBo --

Me either. Unfortunately, as I understood from previous discussions, Mirek is thinking that:

- 1) STL is evil because containers in STL are four times slower than containers in NTL/UPP Core, and there are problems with removing data from STL containers;
- 2) BOOST is an extension of STL;
