BTW, to force Upp using a particular version of GCC, I had to write in Setup->Build methods->Compiler name field

gcc -V 3.3

I've previously tried to set Debug options to

-V 3.3 -O0

but it tells me -V 3.3 must go at the beginning of the command line.

- create a symlink called gcc to gcc-3.3

- try: Setup->Build methods->Compiler name
gcc-3.3 or g++
