jadeite wrote on Sun, 12 February 2006 11:21I just noticed in another forum that some modifications had been made to give more 'native' appearrance on win32, and I was interested in building a couple of examples to see this.Well, you can do that one withouth uvs2 too.
1) Backup your .../uppsrc/CtrlLib/Ctrl.iml
2) Download Ctrl.iml.zip, extract, and overwrite .../uppsrc/CtrlLib/Ctrl.iml
3) Compile any example, or TheIde itself to see the "more native" Win2000 look.
Even if you break something, which is quite unprobable, it's very easy to reinstall u++.
