Hello folks,

just trying to do a little editor for a lcd display to show status of pc as graphics.

Now I use the GridCtrl and I'm really impressed

I added an EditField with a FrameRight<Button> to edit a filename of an image (with FileSel). The problem is the length of the filename. How can I align it right, so at first the path is hidden...

Or maybe how can I add a tooltip so everyone can see the filename?

Maybe someone knows a solution.

Thanks in advance!

Heli
