Hi Guys,

I just started working on a console app and when launching TheIDE, the package/project does not list? It's listed in the MyApps folder. Here's a simple example of the steps taken:

1) Launch TheIDE
2) Select New Package
3) From the Create new package dialog box, select, "Core console project"
4) For package name, type, "Hello"
5) Select the Create button
6) Edit one's program as such:

```
#include <Core/Core.h>
#include <iostream>

using namespace Upp;
using namespace std;

CONSOLE_APP_MAIN
{
 cout << "HELLO" << endl;
}
```

7) Save the program
8) Launch and test the program
9) Exit and restart TheIDE
10) Hey, where did the project go???

Peter

PS: Weird that the '8' followed by a ')' creates a cool face.
