Hi Guys,

A console app looks something like:

```
#include <Core/Core.h>
#include <iostream>

using namespace Upp;
using namespace std;

CONSOLE_APP_MAIN
{
    cout << "HELLO" << endl;
}
```

What's the magic code to extract command line arguments?

Peter

Dear ptkacz

You can use CommandLine()

```
CONSOLE_APP_MAIN
{
    const Vector<String>& cmdline = CommandLine();
    for(int i = 0; i < cmdline.GetCount(); i++) {
        ...
    }
}
```
