Subject: Save sccatterCtrl to png: resolution

Hi there,
still playing around with scatterCtrl and have a new question. :blush:
When saving the scatterCtrl to a png with SaveToFile(), the resulting .png file has a very low
resolution; the scatterCtrl on screen has a much higher resolution and if I use the Report is even
higher; is there a way to set an higher resolution?
Thanks,
Gio

I got myself an answer: using PNGEncoder did the trick; anyway, I wonder if there is a way to
change resolution with SaveToFile():

Dear Giorgio

Before calling SaveToFile() you can use SetSize(Size sz) to set the control size and
SetCopyRatio(int ratio) to set the scale.
