I need to establish a connection to the Oracle 12c database, however I realized that U++ only supports version 8 of the Oracle. Can you tell me another method of connecting using Oracle that works with U++. If you can send an example, thank you!

The last time I have checked, Oracle was 'backwards compatible' w.r.t. client. I bet that Oci8 will work with 12c.

I think that at the time I was abandoning Oracle, I was using Oci7 with Oracle11g.

Mirek

Thanks Mirek, I'll see if I can make the connection.

Did it work for you? Because I may have to connect to Oracle 12c as well.

Yes it worked very well, use versions 7 and 8 of oracle to connect in version 12 of the oracle. I connected using:

oracle.Open("username/password@ip:port/ServiceName",NULL,NULL); //

Which version of oracle instantclient you used ?

Want to connect to Oracle 19.C
