I mean, it is finished, but I am expecting that there might be some more issues.

One temporary issue I have noticed: Right now, DNS servers worldwide seem to be not completely updated to the new IP. Sometimes I am getting 'old' IP e.g. when doing ping... I believe this should resolve itself in a couple of hours.

Hi Mirek,

Downloading any file with https gives error.
https://www.ultimatepp.org/forums/index.php?t=getfile&id =5344&

http allows download.
