hi

I am new to U++. I triad to build some tutorials and test even a simple window app but I allows get this his error if I chose GCC build method

///upp/uppsrc/Core/Map.hpp (268): error: call of overloaded 'Sort(Upp::Vector<int>&)' is ambiguous

every thing works if I used CLANG

thanks for you help

What is your gcc --version ?

Very likely you are using old GCC which is not C++14 compliant.
