Hello,

I was not able to find a method that automatically break or continue the line in a new row when the cursor reach the right border of the window.
I would like to use the CodeEditor to write markdown text.

Thanks,
Luigi

Makes sense, implemented:

CodeEditor::WordWrap

and option in theide.

CodeEditor::WordWrap

Thanks!
I tried

.WordWrap(true)

and even false, but the text continue to stay on the same row overcoming the right border window.
Should I use it with someother option? At moment my codeeditor is in the right side of a splitterctrl.

Even WordwrapComments that is set in theide seems do not work.

Thanks,

Luigi

I works in theide (check).

My bet is you do not have the right margin set.

You are right. I didn't know to set it with
.BorderColumn(int col);

Thanks,
Luigi
