Subject: Calendar "Today:" date field format

Class Calendar has a default "Today:" date field of mm/dd/yyyy.

Is there a way to change this to dd/mm/yyyy.

Putting

```
SetDateFormat("%2:02d/%3:02d/%1:4d");
SetDateScan("mdy")
```

in the Dialog ctor or Init() function (that sets the Calendar object date)
has no effect on the "Today:" date format.
