Subject: How to change shortcut in TheIDE?

I nominate that the <CTRL> + b key sequence as the top U++ IDE feature! It always brings that bit of excitement to coding when accidently missing the v in <ctrl> + v, attempting to paste things into the editor!

How does one redefine this key sequence, or can we vote it out of U++ IDE, or add it into one of the drop-down menus, or just turn it into a frog?

Peter

Hello,

I have never accidentally press Ctrl+B instead of Ctrl+V. But, maybe in the past I didn't code too much using TheIDE

You can change the Ctrl+B shortcut behavior in "Setup -> Keyboard shortcuts (The window should open) -> Ide -> View as binary". If you do not want any shortcut just remove it from the dialog.

Sincerely,
Klugier
