Hello,

I would like to wish all the best in the coming 2018 The past year (2017) was/is definitly the good year for U++. We have two major releases (2017.1 & 2017.2) with a lot of new content and hot fixes. U++ is mature and stable despite the fact that our backlog and known defects list is big.

I would like to also thank all the people involve in the releases. These people came from our brilliant community and done perfect job.

At the end, I wish you all the best in your personal and professional life. Let the U++ power be with you in 2018

Sincerely and happy new year,
Klugier

Happy new year!

And thanks again for this wonderful product.

Best Regards,
Oblivion

Happy new year
and I wish you all the best for now and the future.

And thanks for this fantastic U++ framework.

Thomas
