Subject: MSC9 and c++11

Hello,

on an old laptop I have a MSC9 compiler installed in 2014.
I tried to compile the latest U++ but it fails:

C:\upp/uppsrc\Core/Core.h (45): fatal error C1189: #error : This version of U++ REQUIRES C++11

I tried to add the compiler option

/std:c++11

and still complain:

cl : Command line warning D9002 : ignoring unknown option '/std:c++11'

Can that version compile the new U++ or I must get rid it?
Thanks,
Luigi

Hello,

You must update your compiler. MSC9 is too old to work with the latest version of the U++, it is even to old for the previous release. Just grab Visual Studio 2017 community edition and enjoy latest version of U++

Please read following topic: https://www.ultimatepp.org/appideinstall$en-us.html.

Sincerely,
Klugier
