- I have removed "supersampling" mode - instead there are buttons to scale up (2x or 3x) and supersample down and preview option that makes supersampled down versions visible in real size.

- In addition to "Shift+click" flood fill, there are now "Ctrl+click" and "Alt+click" fills that have a tolerance for flooded color (Ctrl has less tolerance, Alt has more).

- There is a new "Slice" command that splits the image to several smaller ones
