One of the messages in the forum broke RSS feed
https://www.ultimatepp.org/forums/feed.php?mode=m&l=1&am p;basic=1
Xml validator https://www.xmlvalidation.com shows this error: An invalid XML character (Unicode: 0x3) was found in the CDATA section.
Maybe there is a plugin to FUDForum that escapes incorrect characters?

Hello,

It seems that we have similar problem with invalid sequence in more places. For example https://www.ultimatepp.org/examples$GoogleMaps$en-us.html. If it is related to your problem Zbych - we should fix it too.

Sincerely,
Klugier
