One of the messages in the forum broke RSS feed

<https://www.ultimatepp.org/forums/feed.php?mode=m&l=1&basic=1>

Xml validator <https://www.xmlvalidation.com> shows this error: An invalid XML character (Unicode: 0x3) was found in the CDATA section.

Maybe there is a plugin to FUDForum that escapes incorrect characters?

Hello,

It seems that we have similar problem with invalid sequence in more places. For example [https://www.ultimatepp.org/examples\\$GoogleMaps\\$en-us.html](https://www.ultimatepp.org/examples$GoogleMaps$en-us.html). If it is related to your problem Zbych - we should fix it too.

Sincerely,
Klugier
