Hi all,  
when I try to compile my project I receive the error below about Core.  
What does it mean?

Regards,  
Matteo

Error:

```
C:\upp\uppsrc\Core\Mt.cpp (635): error: '_mm_pause' was not declared in this scope  
(): _mm_pause ();  
C:\upp\uppsrc\Core\Mt.cpp (635): note: suggested alternative: '_mm_free'  
(): _mm_pause ();  
(): _mm_free
```

Core\Mt.cpp

```
void SpinLock::Wait()  
{  
    volatile int n = 0;  
    while(locked) {  
        #ifdef CPU_X86  
            _mm_pause();          <<<<<<< ROW 635  
        #endif  
        if(n++ > 500)  
            Sleep(0);  
    }  
}
```

Hello Matteo,

Your question is answered here:

<https://www.ultimatepp.org/forums/index.php?t=msg&th=10219&start=0&>

You can update your copy of U++ to latest, nightly build, or -a quick fix- simply add:

#include <xmmintrin.h>

Best regards,  
Oblivion

Thank you Oblivion,  
it works!

regards,  
Matteo
