Subject: Installation on Manjaro (Arch based)

I installed theide (version 10804-3 - maintained by dolik.rce - last updated 2017-05-03) on a
Manjaro 4.14.16-1 x86-64.
When I launched TheIDE for the first time I got the Initial setting wizard.
If I choose "Local copy of sources from /usr/share/upp (recommended)" for the
"Source code handling methods" all my /home/jcag contents is copied in a /home/jcag/upp folder.
What can I do ?
Thanks in advance.
