Subject: .exe not launching: sometimes
Posted by mtdew3q on Sun, 25 Feb 2018 05:10:39 GMT

Hi-

Just quick question:

Sometimes .exe won't launch. Only thing I can think of is cutting and pasting code from web into the editor. Could that cause it?

If I start over with code and do brand new project, I can get dialog to run, but if in middle of project, sometimes it seems like gremlins.

Please let me know if it ever happens and if there are any tricks.

thx. -

This is not normal.

Cannot help without more details though.

Hi-

I think it is a package causing this to happen. If I remove the package from my project and/or some related files I get the .exe to launch again.

I will target my testing of the code, so I don't run in to this problem again.

thx.-

thx. Mirek!

It is no longer a problem.

I was experimenting with a package I wasn't sure on.

I decided to learn the controls it works with and never mind the rest of the possible controls.

thx. -
