Hello,

I'm trying to fix some old Bazaar packages, and I stumbled about a problem... the Web package (which AFAIK is obsoleted) doesn't build anymore, and so the embedded ScgiServer module.
Shall I provide a new ScgiServer package in Bazaar, or the old one has been moved somewhere else ?

Ciao

Max

Hi Mirek,

I'm attaching here a version of Web package with some changes to make it build... not really sure if they're correct.
Could you please check it and, if ok, update it on repo ?

Thank you

Max
