Hi!
I still dont very understand how to change the deafult style of ctrl.
how to change the deafault look of the ScrollBar ?
Thanks!

You need a reference to the ScrollBar style:
ScrollBar::Style& d = ScrollBar::StyleDefault().Write();

Then you need to overwrite d.hlower, d.hthumb, d.hupper, d.vlower, d.vthumb, d.vupper with images.

It is fairly straight forward, with 2 buttons and the thumb.

There is little more to it with the up, down, left and right fields too.
