Hi all,

For my needs I implemented PostgreSql returning statement. Using it is much faster then calling GetInsertedId(). You can use such code: `int id = SQL % Insert(TABLE)(COLUMN1, value1)(COLUMN2, value2).Returning(ID);` I attach a patch. I am not sure whether it could be added to official sources because it is PostgreSql specific.

Yes, that would be a great addition. I have plenty GetInsertedId's and I'm using Postgres
