Hi all,

For my needs I implemented PostgreSQL returning statement. Using it is much faster then calling GetInsertedId(). You can use such code:  
int id = SQL % Insert(TABLE)(COLUMN1, value1)(COLUMN2, value2).Returning(ID);  
I attach a patch. I am not sure whether it could be added to official sources because it is PostgreSQL specific.

Yes, that would be a great addition. I have plenty GetInsertedId's and I'm using Postgres :)
