Hello there !

Today, once again, I got a probleme with one of my object :

```
class Parking : public Upp::MoveableAndDeepCopyOption<Parking> { //I'd try with
Upp::Moveable<Parking>
 private:
	...
	Upp::VectorMap<Upp::String, Upp::String> mesTarif;
	...
};
```

```
 C:\Users\Administrateur.WINDOWS-060HJTR\Desktop\upp/uppsrc/C ore/Vcont.h (98): required
from 'T& Upp::Vector<T>::Add(const T&) [with T = Parking]'
 C:\Users\Administrateur.WINDOWS-060HJTR\Desktop\upp/uppsrc/C ore/Core.h (272): In file
included from  C:\Users\Administrateur.WINDOWS-060HJTR\Desktop\upp/uppsrc/C
ore/Core.h:272:0,
 C:\Users\Administrateur.WINDOWS-060HJTR\Desktop\upp\MyApps\T
inyWebServer\TinyWebServer.cpp (1): from
C:\Users\Administrateur.WINDOWS-060HJTR\Desktop\upp\MyApps\T
inyWebServer\TinyWebServer.cpp:1:
 C:\Users\Administrateur.WINDOWS-060HJTR\Desktop\upp\MyApps\T
inyWebServer\TinyWebServer.cpp (543): required from here
 C:\Users\Administrateur.WINDOWS-060HJTR\Desktop\upp/uppsrc/C ore/Topt.h (225): error: no
matching function for call to 'Parking::Parking(const Parking&, int)'
```

My Vector map raise error on compilation even with MoveableAndDeepCopyOption/Moveable.
Can someone explain me how can I fix this error ? and why it occure ?

Thanks in advance.

have good day !
