Hello Everyone !

Today I'm trying to use InternetExplorerBrowser from Control4U.

Here is my code :

leController.lay

```
LAYOUT(leControllerLayout, 328, 272)
  ITEM(InternetExplorerBrowser, myle, SetStatus(false).LeftPosZ(16, 296).VSizePosZ(28, 28))
END_LAYOUT
```

main.cpp

```
#include "leController.h"
#include <Controls4U/Controls4U.h>
#include <Controls4U/ActiveX.h>
#include <Controls4U/ActiveX_base.h>
leController::leController()
{
  CtrlLayout(*this, "Window title");
  myle.SetStatus("true");
  myle.Browse("www.google.fr");
}
```

```
GUI_APP_MAIN
{
  leController().Run();
}
```

leController.h

```
#ifndef _leController_leController_h
#define _leController_leController_h

#include <CtrlLib/CtrlLib.h>
#include <Controls4U/Controls4U.h>
#include <Controls4U/ActiveX.h>
#include <Controls4U/ActiveX_base.h>
using namespace Upp;

#define LAYOUTFILE <leController/leController.lay>
#include <CtrlCore/lay.h>
```

```
class leController : public WithleControllerLayout<TopWindow> {  
    InternetExplorerBrowser ie;  
  
public:  
    typedef leController CLASSNAME;  
    leController();  
};  
  
#endif
```

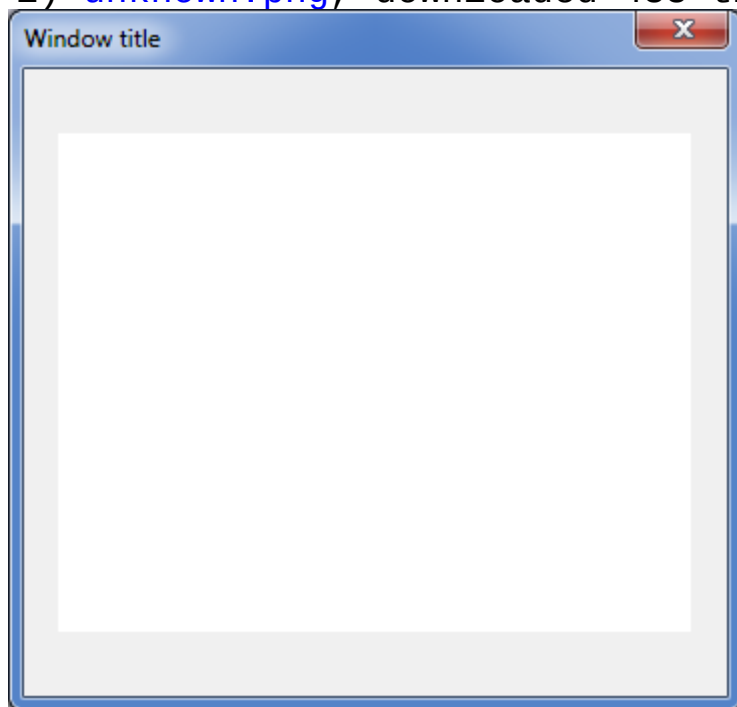

This small code work but my IEBrowser do not appear in my TopWindow (the Control4U_Demo worked perfectly).

Can someone help me guess why the problem occure ?

Thanks in advance, have a good day !

Hi Xemuth

Oooh, this old code still works!

Please send your demo package in a zip to test it easier.

Hello Koldo, thanks for the reply,

here is the demo package I used.

I suspect an non initialisation of ActiveX Controls.
But it seems like I'm doing the same thing than Control4U_Demo.

Thanks in advance.

Solved.

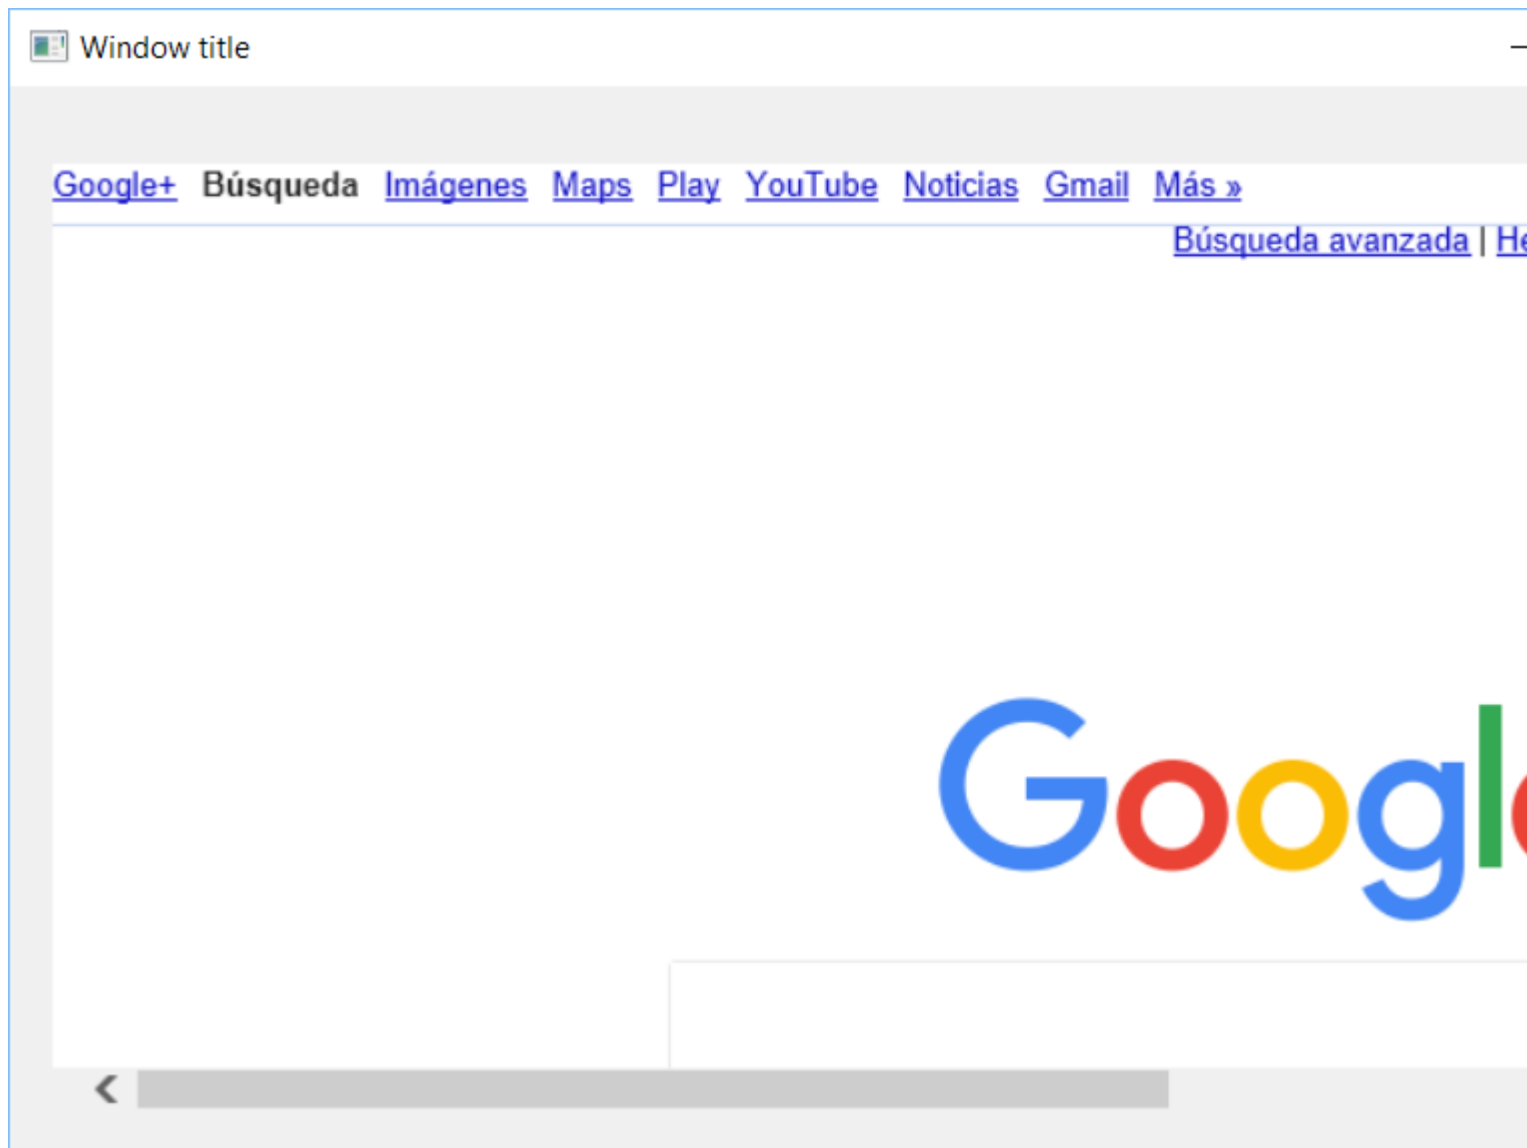

The detail is that control is started in its constructor.

However then the window is not totally initialized, so control start fails. In fact, myle.SetStatus(true) returns false.

Here I enclose you the modified version.

Hello Koldo,

Thanks a lot, you unlocked me !

Have a good day !
