Edit:

Ok, I have seen other problems for examples "Mathtools" cannot be compiled anymore.
Something in headers must have been changed.

So I conclude the nightly builds are unfinished work in progress and so this is not a bug, but unfinished work.

I was confused, because the website recommends to choose nightly build.....

Original message:

I have downloaded recent nightly build 12537.

Context search (Alt-J) seems to be buggy with the recent nightly builds.
Sometimes it works, sometimes not.

Testcase:

upp\reference\guilock\main.cpp

For example, App::Run() or Call() doesnt work with Alt-J
These are methods inherited from TopWindow.

Possibly context search doesnt work with inherited methods anymore?

Now I have deleted nightly build and reinstalled stable build.
With stable build it functions as expected.
(I am on Windows 10 64 Bit)

Hello Peterh

Bazaar/Mathtools already compiles.
Thank you for your report.

Current NB 12567 still has the problem:

```
C:\upp\bazaar\MathTools\Calculator.cpp (44): error C2664: 'void
Upp::EvalExpr::GetConstant(int,Upp::String &,Upp::doubleUnit &)': cannot convert argument 3
from 'double' to 'Upp::doubleUnit &'
C:\upp\bazaar\MathTools\Calculator.cpp (49): error C2664: 'void
Upp::EvalExpr::GetVariable(int,Upp::String &,Upp::doubleUnit &)': cannot convert argument 3
from 'double' to 'Upp::doubleUnit &'
C:\upp\bazaar\MathTools\Calculator.cpp (124): error C2440: '=': cannot convert from
'Upp::doubleUnit' to 'double'
C:\upp\bazaar\MathTools\Calculator.cpp (134): error C2440: '=': cannot convert from
'Upp::doubleUnit' to 'double'
C:\upp\bazaar\MathTools\Calculator.cpp (138): error C2440: '=': cannot convert from
'Upp::doubleUnit' to 'double'
```

Also context search (Alt-J) finds unrelated stuff.

For example search for "TopWindow" ends up at a Place where TopWindow is only mentioned in a comment.

As a beginner I am lost without "Alt-J", I need it to explore and understand all this stuff.

Anyway I will happily test again later with a later version.

Nowadays I am only a casual home-programmer, so I cannot do more than to report problems currently ;)

But I like Upp++; thank you for working on it!

Dear PeterH

Your report is about 12567. However MathTools update was 12568.
Please update your U++ and report if everything is OK.
Thank you.

I didnt know the number.
NB 12567 is presently the newest to download online.
I try again later.
