When pressing "Generate code.." in layout designer and then "Copy to clipboard", previous theme changes to original one.

I don't know if this is still present in the latest version, but still - tested on ver11658.

If i am correct, the same bug was produced when using Setup->Abbreviations.. in the past.

This bug is still present in latest v16299.

To produce:

- * create usual window
 - * create another layout with eg one button
 - * set theme to dark
 - * now, use Generate code.. and Copy to clipboard..
 - * after this theme is changed, to check - change to any source file
-
