Subject: Automatic Build Methods setup - Does it find MinGW?
Posted by peterh on Sun, 25 Nov 2018 19:34:11 GMT

Hello,

If I download Upp++ without toolchain, it finds MSVS17.
It doesnt find MinGW.
How must I install MinGW, so that it is automatically recognised?
Can I download Upp++ with MinGW toolchain and then move MINGW to another globally known place?
How to do this?

All the best,

Peter
